**I \* COMPREHENSION (4 points).** CHOOSE TEXT 1 OR TEXT 2 AND ANSWER ALL THE QUESTIONS FROM THAT TEXT ONLY.

**TEXT 1: THE BEST TETRIS PLAYER IN THE WORLD** **KEY**

- 1 My brother Andy and I are regular Tetris players. We've been playing Tetris on our PlayStation for ages. However, we were  
2 absolutely amazed when we found a YouTube video of the Classic Tetris World Championship in 2018. The competitors used  
3 classic 80s Nintendo consoles; their speed at making decisions was genius. We became hooked. I was ten, and Andy thirteen.  
4 Three years later, we qualified for the Tetris world championships and then competed against each other for the title!  
5 The championship had begun in 2010, but things got interesting in 2018 when a 16-year-old dethroned the world champion.  
6 After that, we began to play competitively; we would shout our scores at each other from our bedrooms. We've always been into  
7 electronics, and Dad taught us to code when we were five. I'm a straight-A student, and maths is my favourite subject, so gaming  
8 fits the way my mind works.  
9 The final took place on a Sunday. I had an old-school TV in my room and played from an office chair; my brother sat in an old  
10 rocking chair. We played five games, and I won during the decisive match. Andy walked across the hall into my room and gave  
11 me a high five. With the \$3,000 prize money, I bought a guitar and invested in cryptocurrency. I've also set up my own tournament,  
12 Classic Tetris Brawl, and now sell my own merchandising, too.  
13 I wasn't well known at school before but now I'm "the Tetris guy". I usually play Tetris once a day when school and homework  
14 are done. As a 13-year-old world champion, I know that the key to success is learning what makes other players better than you.

### TEXT 2: PHOTOGRAPHING THE NORTHERN LIGHTS **KEY**

- 1 The aurora borealis, also known as the Northern Lights, occurs as a result of energy released by solar magnetic fields that  
2 expel large quantities of charged particles at high speed from the Sun. It can reach Earth in 24 to 72 hours and, if conditions are  
3 right, the electrons and protons flow along the Earth's magnetic field to the polar regions where they interact with oxygen and  
4 nitrogen to produce a magical red, green, and purple dancing light show in the night sky.
- 5 Peak northern lights season ranges from September to March. Although seeing the natural phenomenon requires a  
6 complicated combination of events, Iceland is considered a spectacular location. For this reason, and with the primary objective of  
7 increasing inbound tourism to the island, Hotel Rangá is searching for its first-ever official "lights catcher", a photographer who will  
8 spend a month capturing photos and videos of the night sky's colours in exchange for room and food.
- 9 The chosen photographer will receive airfare to and from Iceland and must be available for three weeks from mid-September  
10 to mid-October. The candidate must also have the ability to provide high-quality content, of which the hotel will retain the license.  
11 The task should not be extremely challenging since the hotel is such a prime viewing spot that it has its own observatory with two  
12 telescopes and a retractable roof. Moreover, local astronomers will join the guest.
- 13 To apply, photographers must fill out the online application, which includes questions about social media reach, photography  
14 experience in darkness and previous travel in Iceland. Applicants also need to answer why they should become the hotel's lights  
15 catcher. Additional information is provided on the Hotel Rangá website.
