Paper

The Oxford Record Linkage Study: A Review of the Method with some Preliminary Results

by E D Acheson DM MRCP and

J G Evans MB MRCP

*(Nuffield Department of Clinical Medicine,
Oxford University)*

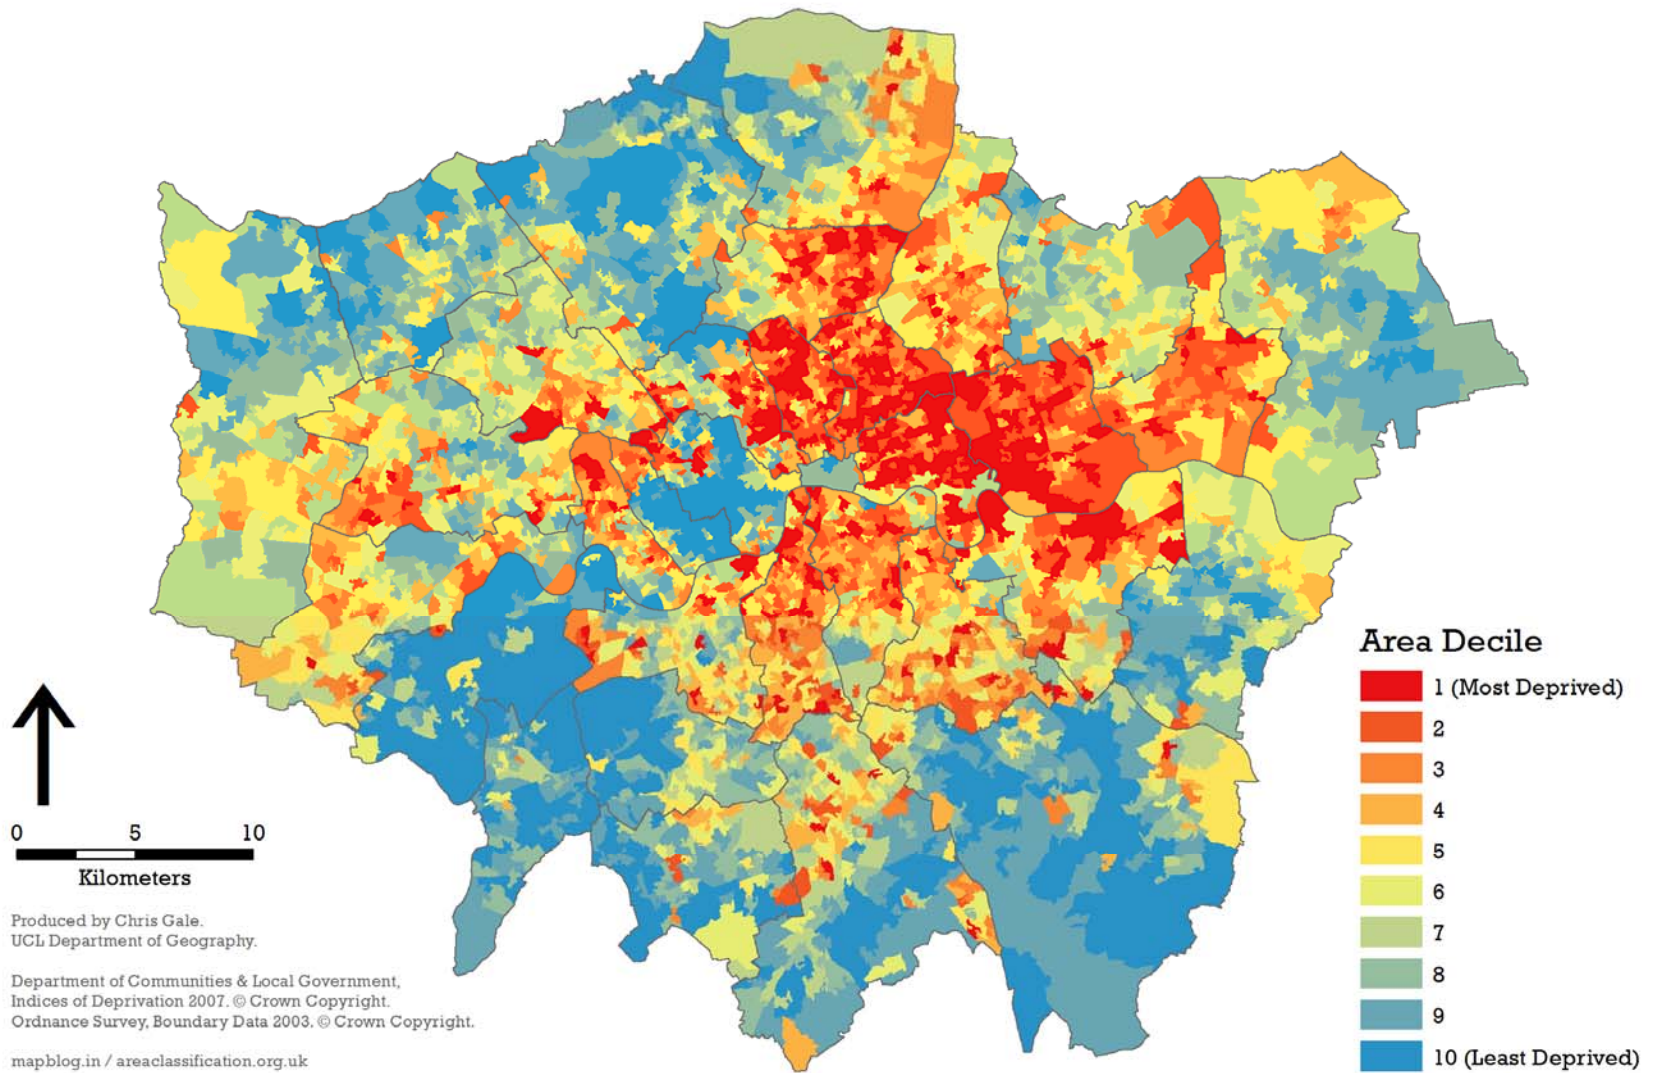

Introduction

We have begun an experiment in Oxford in re-

Current Lack of Organization

In Britain many important data are recorded about health and disease, and we have certain types of health statistics available on a national scale. For example, for many years we have had the most sophisticated analysis of mortality in the world; valuable data concerning discharges from hospital are also provided by the Hospital Inpatient Enquiry; an annual digest of certificates of incapacity for work is also available. Much information of epidemiological and administrative

Brown apologises for records loss

Prime Minister Gordon Brown has said he "profoundly regrets" the loss of 25 million child benefit records.

He apologised in the Commons for the "inconvenience and worries" caused and said the government was working to prevent the data being used for fraud.

But Conservative leader David Cameron said the government had "failed in its first duty to protect the public"

Mr Brown said the government was not "complacent" about the losses

Brown apologises

Administrative Data
Research Network

ADRC-Scotland

- ▶ Co-located with Farr Institute, Scottish Government and NHS.
- ▶ Universities of Aberdeen, Dundee, Edinburgh, Glasgow, Herriot-Watt, St Andrews and Stirling.
- ▶ Expertise in admin. data and Public Engagement, linkage, Law and relevant computer science techniques.

Research the major Scottish administrative datasets

- Schools, colleges and universities
- The criminal and justice system
- Social work services
- Social welfare
- Housing system
- Transport system
- Health system
- Historical administrative data

- ▶ Approving projects
- ▶ De-identified data
- ▶ Trusted researchers
- ▶ Secure environment
- ▶ Safe results
- ▶ Legal framework

Protecting privacy

Share

We aim to have the highest standards of secure data sharing, which will be consistent across the Network. This means:

- [safe projects](#) - only projects approved by our [Approvals Panel](#) will have access to our services.
- [safe people](#) - only accredited researchers will have access to the Network's services.
- [safe, de-identified data](#): researchers will not be able to see information which directly identify any individual.
- [secure environments](#): state-of-the-art secure information technology and procedures will provide physical, hardware and software security across the whole Network.

Synthetic data

Real (input)

Sex	Age	Education	Marital status	Income	Life satisfaction
FEMALE	57	VOCATIONAL/GRAMMAR	MARRIED	800	PLEASED
MALE	41	SECONDARY	UNMARRIED	1500	MIXED
FEMALE	18	VOCATIONAL/GRAMMAR	UNMARRIED	NA	PLEASED
FEMALE	78	PRIMARY/NO EDUCATION	WIDOWED	900	MIXED
FEMALE	54	VOCATIONAL/GRAMMAR	MARRIED	1500	MOSTLY SATISFIED
MALE	20	SECONDARY	UNMARRIED	-8	PLEASED
FEMALE	39	SECONDARY	MARRIED	2000	MOSTLY SATISFIED
MALE	39	SECONDARY	MARRIED	1197	MIXED
FEMALE	38	VOCATIONAL/GRAMMAR	MARRIED	NA	MOSTLY DISSATISFIED
FEMALE	73	VOCATIONAL/GRAMMAR			
FEMALE	54	SECONDARY			
MALE	30	VOCATIONAL/GRAMMAR			
MALE	68	SECONDARY			
MALE	61	PRIMARY/NO EDUCATION			

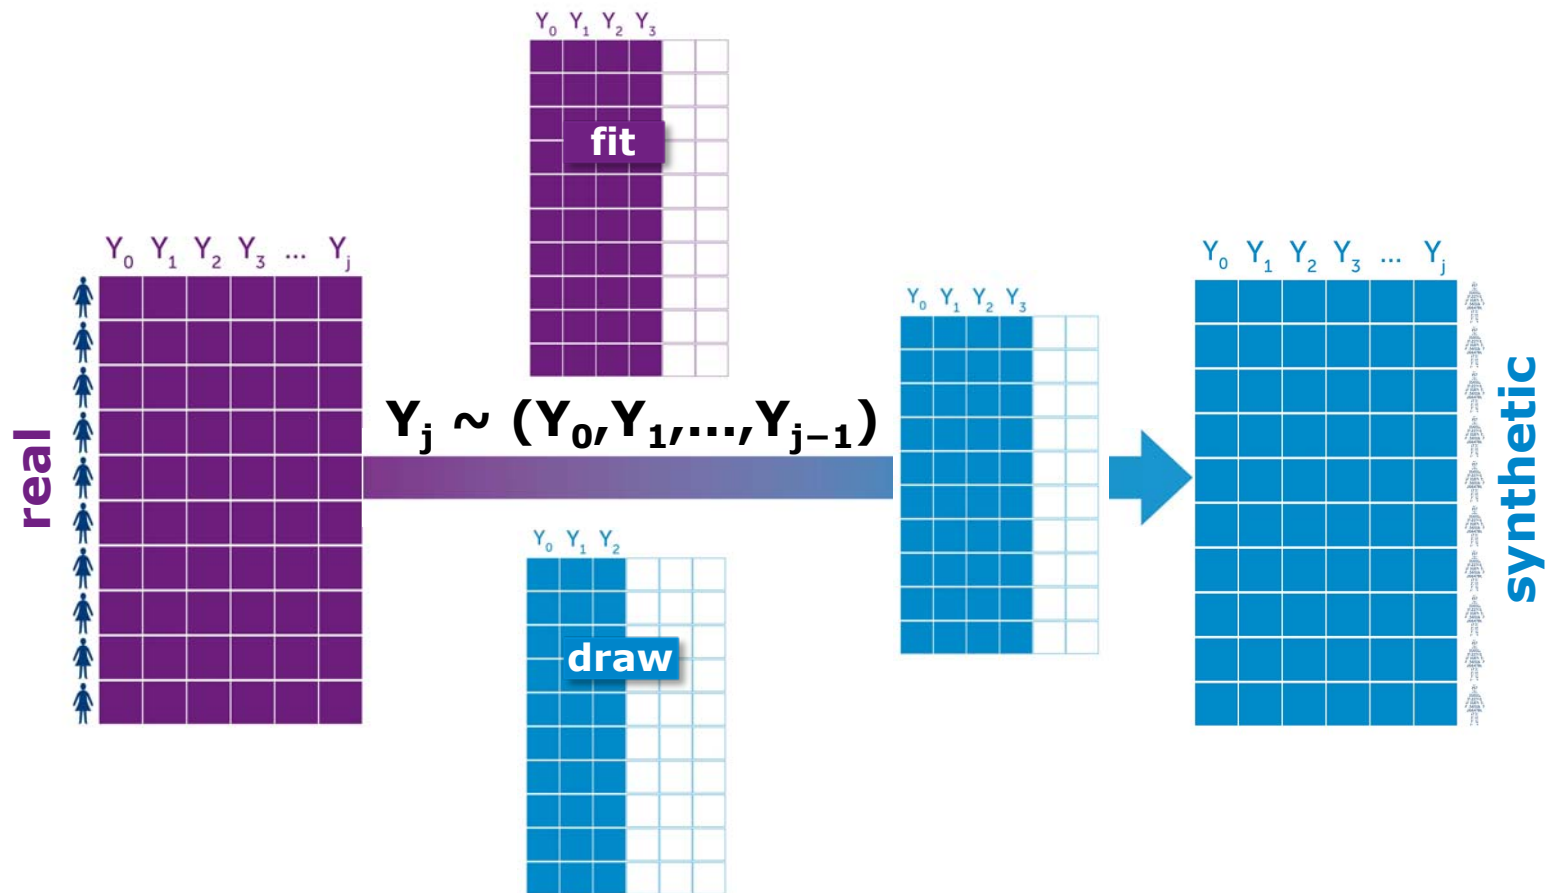

Synthetic (output)

Data that look (structurally) like original data but contain artificial units only

Sex	Age	Education	Marital status	Income	Life satisfaction
MALE	81	PRIMARY/NO EDUCATION	MARRIED	2100	PLEASED
MALE	54	VOCATIONAL/GRAMMAR	MARRIED	1700	PLEASED
FEMALE	32	VOCATIONAL/GRAMMAR	DIVORCED	870	MIXED
FEMALE	98	PRIMARY/NO EDUCATION	MARRIED	800	MOSTLY DISSATISFIED
FEMALE	50	PRIMARY/NO EDUCATION	MARRIED	NA	MOSTLY SATISFIED
FEMALE	37	VOCATIONAL/GRAMMAR	MARRIED	158	PLEASED
MALE	28	VOCATIONAL/GRAMMAR	NA	1500	MOSTLY SATISFIED
FEMALE	62	PRIMARY/NO EDUCATION	MARRIED	830	MOSTLY SATISFIED
MALE	78	PRIMARY/NO EDUCATION	MARRIED	NA	PLEASED
FEMALE	29	SECONDARY	MARRIED	580	MOSTLY SATISFIED
MALE	59	PRIMARY/NO EDUCATION	MARRIED	1300	MOSTLY SATISFIED
MALE	41	SECONDARY	UNMARRIED	1500	MIXED
MALE	18	SECONDARY	UNMARRIED	-8	PLEASED
FEMALE	73	PRIMARY/NO EDUCATION	WIDOWED	1350	MOSTLY SATISFIED

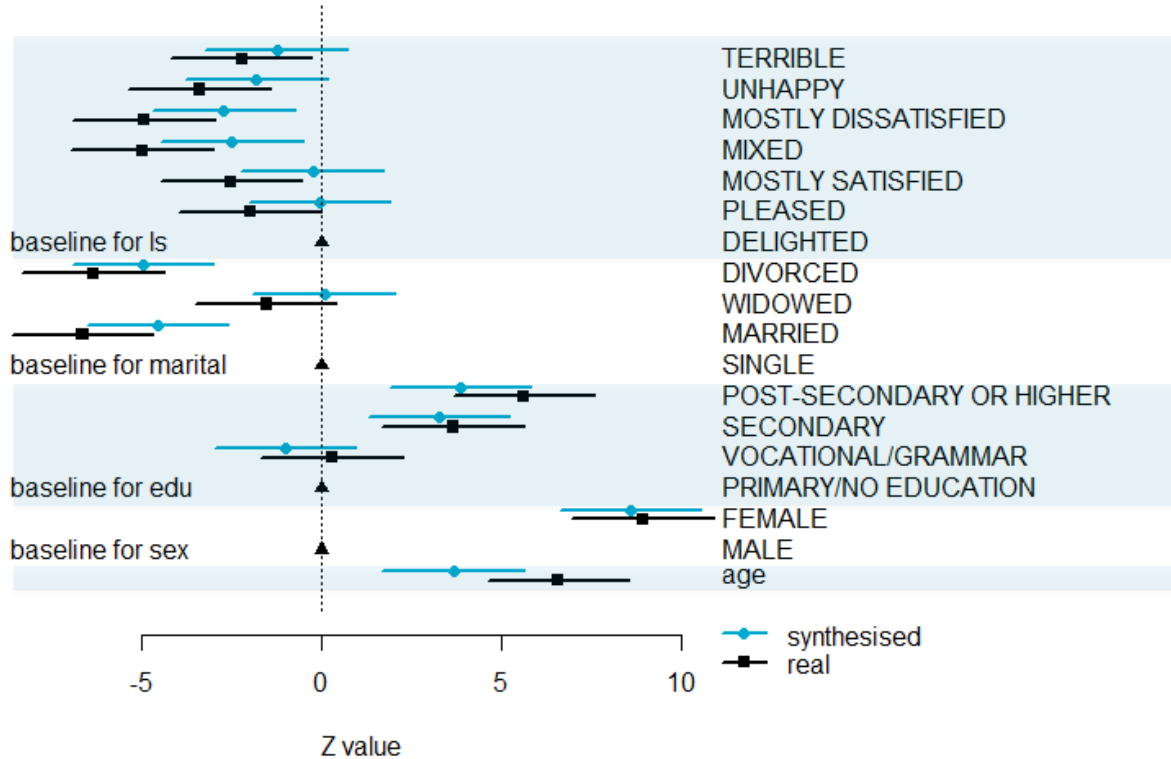

Generating synthetic data

Sequentially replacing **original data values** with **synthetic values** generated from conditional probability distributions

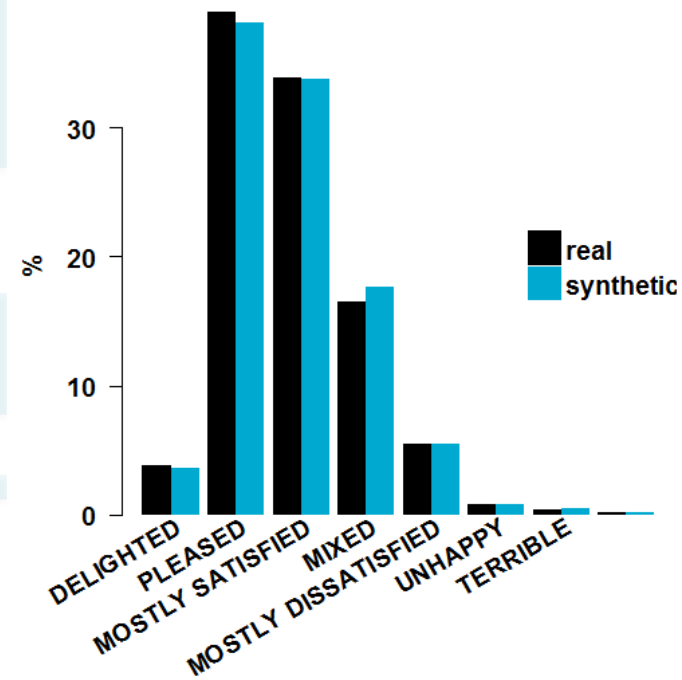

Data that behave (statistically) like original data

Compare Z values for fit to smoke

Life satisfaction

Final thoughts

- Established of a common approach
- Greater amounts of data sharing
- But risks to present system
 - Need for public engagement
 - No specific data sharing legislation
 - Changes to data protection legislation
