The Annual Report on the Environment in Andalusia is the result of a collective effort. The Regional Ministry of Environment and Spatial Planning acknowledges and appreciates the contribution of those who have made this publication possible.

The **Annual Report on the Environment in Andalusia 2012** has been produced under the initiative of the Regional Ministry of Environment and Spatial Planning of the Junta de Andalucía and developed by the Deputy Ministry.

The different tasks have been coordinated by the technical support teams of the Environmental Information Network of Andalusia (REDIAM by its acronym in Spanish) and from the Regional Ministry of Environment and Spatial Planning and from the Environment and Water Agency.

The Directorates of the Regional Ministry of Environment and Spatial Planning and the Environment and Water Agency, especially the REDIAM network, have taken active part in providing information and developing contents.

Furthermore, authorities from National, Regional and Local Administrations, as well as public and private companies, research centres, universities, associations and other citizen organizations have also provided information.

ecoedicion
[pilot project]
Environmental impacts

Fossil resource depletion	Ozone layer depletion	Carbon footprint
		
0,65 kg petróleo eq 14,41 %	1,52E-7 kg CFC - 11 eq 0,25 %	1,92 kg CO ₂ eq 6,27 %

Impact referred to the average environmental impact of a European citizen per day

ecoedicion.eu JUNTA DE ANDALUCÍA LIFE08 ENV/ES/000124

This book uses paper from sustainable forest management with FSC® chain of custody and its inks contain no heavy metals. All this applying sustainable management criteria in progress by the Life+ Ecoedicion project, initiative of the Regional Ministry of Environment and Spatial Planning of Junta de Andalucía.
